

DAYTONA AQUACLEAN

DAYTONA 62

Technical specifications

Composition: 51% polyester, 38% acrylic, 11% polyamide

Weight: 395 g/m²

Tear strength: >20N (BS 4303) - >3 (DIN 53859-5)

Tensile strength: >350N (ISO 13924-1)

Tear displacement: < 4 (BS 3320) - <6 (DIN 53868)

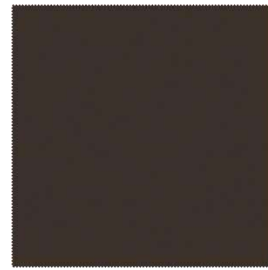

Abrasion resistance: >200 cycles UNE EN ISO 12947

Piling resistance: 5 (5 max) no pilling (ISO DIS 12945-2)

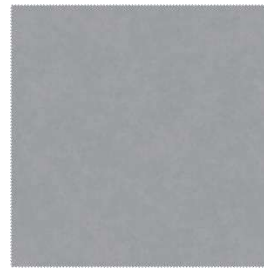

Dye resistance to rubbing: 4 (5 max) Good (ISO 105-X12)

Dye resistance to light: 6 Good (ISO 105-B02)

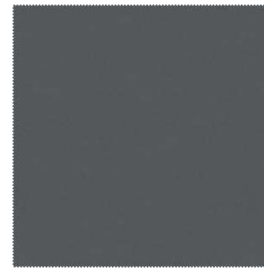

Made in Spain

Scan the QR code to find out more about the **Aquaclean®** cleaning method.

Maintenance

For normal sofa maintenance we recommend that you vacuum the entire surface area regularly. You can use a normal home vacuum cleaner with a brush fitting.

Water cleaning in three simple steps.

Aquaclean® Technology enables you to get rid of small stains such as wine, coffee, food and even most marker pens without having to wash with soap or detergent.

1. Remove any excess residue from your upholstery.
2. Apply water* over the stain, either directly or using a damp cloth, then wait a few seconds.
3. Finally, press down with the damp cloth and rub gently over the fabric in circular movements. If the stain does not come off completely (especially dried in stains) repeat the process as required.

*To avoid potential limescale stains, it is preferable to use bottled water.

Washing instructions

For normal care, you don't need to remove and wash the sofa fabric. But for large or tough stains, before washing review the following instructions:

Liquids or oils

Absorb the excess liquid or oil with a cloth or paper towel, then rub gently with circular movements.

Grease, pen ink

Apply water over the stain, either directly or using a damp cloth. Leave on the fabric for a few seconds, then rub the stain gently with circular movements. Repeat the process as many times as necessary. Always leave the fabric to dry.

Dust

Remove the dust with a vacuum cleaner.

Pet-friendly – recommended for homes with pets!

Thanks to SafeFront® technology, our fabrics are protected against viruses and bacteria. They have been proven to reduce viral activity by over 91% after two hours of continuous contact.

Health, hygiene and well-being

Bacteria and mites really do proliferate if you have pets at home. But SafeFront® is a fantastic ally against these organisms, which can cause allergies, especially in children and the elderly.

Longer lasting

We recommend these fabric for homes with pets due to their loop-free surface, which prevents accidental snags. They also make it easier to remove pet fur and are equipped with SafeFront® to keep the fabric clean from the inside, free from viruses and bacteria, preventing odours caused by them, and allergies caused by dust mites.

Easy maintenance

The surfaces of the Aquaclean® collection are completely smooth, which facilitates the removal of pet fur from the fabric.

Do note that these fabrics are not indestructible, but they do help to prolong your sofa's lifespan.

Tips!

Pets have different behavioral patterns and the best thing you can do to protect your sofa, is to train your pets.

Avoid scratching

Try placing or rubbing orange peel on the fabric as the smell of citrus fruit is usually unpleasant for pets.

Get a scratching post

Give your cats a designated place to stretch and scratch. You can spray some catnip so they'd use the scratching post instead of your sofa. And don't forget to praise them and give them lots of treats to reinforce positive behaviour!

Pet hygiene 1

Trim your pets' claws regularly so they don't try to sharpen them on your sofa.

Pet hygiene 2

Brush your pet regularly to avoid shedding on your sofa.

Proper nutrition

Ensure good nutrition as an inappropriate diet can cause excessive fur loss. This will also prevent them from getting sick and increase the quality of life for you and your pets.
